### Scenario 1

Mangappa a 34-year-old male working as a carpenter and is an illiterate. He owns a semi-pucca house containing two rooms, 1 kitchen, 1 bathroom in V V Nagar, Bengaluru. Family is Hindu by religion and belongs to SC/ST community. He has five daughters and one son, with a gap of 1.5 to 2 years between them. His son is the youngest among all aged 7 years. Currently 6 members reside in the house - Mangappa, his wife, son and two daughters. Mangappa earns around 3000 per month. His wife working as maid in households earns 4000 per month. His son Surya accompanies him to workplace daily except weekends. Mangappa was little tired on the day health worker Gayatri visited his home. On enquiring he told his son was suffering from anemia, he had to take his son to Anurupa temple daily and hence had no earnings since a week.

1. Comment on the socio-economic status of the family
2. List various socio-cultural factors and their impact on health. Add a comment on the socio-cultural factors prevalent in the current family
3. Enumerate and define different types of family and the role of family in health and disease.
4. You are the in charge medical officer of V V Nagar, and while on routine field visit, you came across this family - what would be your approach to educate the family?

IEC and Behavioural change communication (BCC) - concept and examples.

### Scenario 2

1. Mr X, a 40-year male leading an active life. He is an avid tennis player and loves to travel to exotic countries. Lately, Mr X complains of feeling uncharacteristically tired, so he scheduled an appointment with his doctor for an examination. That is when he was diagnosed with HIV. The health educator was informed about the same. Health educator knew that Mr X had multiple sexual practices, hence advised him for the use of condoms but Mr X denied. Develop behaviour change communication strategy for promotion and adherence to condom.

### Scenario 3

2. In a PHC catering a population of 34000, Birth rate was 28/1000 live births. Unmet need of family planning was 48%. The percentage of use of oral contraceptive pills in the community was 0.8%. As a medical officer develop steps for BCC to increase awareness and promote the use of oral contraceptive pills.
